

# Reflections on the Policy Subcommittee Findings

Think 

Small Group Share

Large Group Share

You will have 10 minutes to individually review the Policy Subcommittee Findings— As you review the document, please consider the following questions:

- 1) What stands out?
- 2) What is missing?
- 3) Is this in alignment with the scope of work, target population, and fundamental questions?

**Small Group Reflection:** In your small groups you will share and discuss your responses to the 3 questions above. These questions are intended to help our group identify missing components, and to clarify, and add to or delete challenges. We will review the small group findings with the whole group. Your small group will be asked to identify five priorities for *what stands out* and *what is missing*. Your small group will be asked to report out your findings to the large group.

**Large Group Report Out:** Each small group will be asked to identify their five priorities for two questions below:

- 1) What stood out for your group?
- 2) What is missing – what should be included?

Outcomes for Large Group –

1. Identify what is missing in this document and is critical to our addressing our scope work and intentions –
2. Identify actionable language to be included in the next draft.
