

## Criteria for Reviewing Data

1. Does it provide us with information about our population of youth?
2. Is the source of the data reliable?
3. Is the reported data reliable?
4. Does it provide information related to keeping students engaged in their schools, work, or communities?
5. Does it provide information about trends in the youth population?
6. Does it provide information as to why a youth's educational program is disrupted?
7. What sources are available for community specific data collection? (Organizations, rec. programs, church groups, etc.)
8. How can the data or data systems be improved so that they provide us with more complete information about our target population?
9. Where do youth become re-engaged? Why?
10. Probability matching/Integrated Data
